

Social Responsibility Policy

In developing its activities, Favima Sociedade Têxtil, is committed to:

- Comply with applicable legal provisions and other requirements considered relevant to environmental issues;
- Promote good sustainable consumption practices;
- Minimise waste production through measures to reduce, reuse and recycle materials and equipment;
- Separate and manage waste produced;
- Promote awareness and involvement of all employees in the continuous improvement of their environmental performance;
- Preserve the environment and minimise the environmental impact of its activities through the rational use of resources, promoting management that minimises environmental, social and economic damage, by investing in innovative and sustainable products/equipment, and promoting and raising awareness of environmental management practices throughout its sphere of influence;
- Promote the use of safer and more sustainable chemicals in the production process in order to ensure the protection of the health of all stakeholders, as well as train/raise awareness among all employees on the correct use, storage and handling of chemicals;
- Identify, prevent and mitigate the negative impacts of its activities throughout the value chain, with regard to the environment and human rights. This process involves risk assessment, implementation of measures, and monitoring of results.
